

APPLIED GEOLOGY

Senior Geotechnical/Geoenvironmental Engineer/Engineering Geologist – Lowton, Warrington

Applied Geology Ltd specialises in the provision of geotechnical and contaminated land ground investigation and related consultancy services throughout the UK. Due to our continued growth and high workload, we are seeking to recruit a full time experienced Senior Geotechnical/Geoenvironmental Engineer/Engineering Geologist to work with our team of Geotechnical Engineers, Engineering Geologists and Environmental Specialists, in our office in Lowton, Warrington. You would support and drive the delivery of a diverse range of geotechnical and geoenvironmental ground investigation and consultancy projects, supporting the Regional Director based in Lowton and Technical Directors based in Warwick, mentoring and reviewing the work of junior members of the team and managing your own projects as well as the team/workload in the absence of the Regional Director. Additionally, the role would involve some site-based investigation and earthworks support on technically or logistically complex works.

The successful candidate will likely have a minimum of 7 years experience in the UK geotechnical investigation and consultancy sector, preferably with experience in ground investigation and consultancy business environments. The candidate should have specific experience in undertaking and reviewing Phase 1 Desk Studies, the review of data and scheduling of geotechnical & geoenvironmental testing, together with experience of foundation assessment, earthworks, geoenvironmental risk assessment and geotechnical/geoenvironmental report writing. Prior experience of management of projects, technical proposal writing and management of junior staff is preferable. Although report writing is a key role requirement, the candidate will still be expected to undertake site supervision work on projects that are technically or logistically complex, or in support of junior members of the team. They should have an appropriate geology based first degree, preferably an MSc in a geotechnical or geoenvironmental related subject. A current UK driving licence is required.

This permanent position would be based in our Lowton office and involve a minimum of 37.5 hours per week. A competitive salary, commensurate with qualifications and experience would be offered. Twenty-five days holiday per year (+Bank Holidays), a contributory workplace pension scheme and life insurance cover are also provided. Training and development opportunities will be provided through in-house and external providers to ensure the continued technical and developmental growth of all staff.

Please submit your CV and covering letter either as hard copy or by email to:
